Most of us have been locked inside our homes now for a long while during this pandemic, and the longing for some kind of normality grows stronger with each passing day. Pianist **Annie Locke** has in a way, with this her latest single, created an anthem for that desire of a warm familiarity of normalcy.

It's Good to Be Home is a very pleasing composition, a sense of longing can be found here, but more than anything, a reality and a happiness of being in a safe environment, and perhaps even with someone who is special.

Locke's touch on the keys gifts us a reverie, a gaze from the window of hope, but also one of acceptance and gratitude, all rolled into one very warm and homely performance.
