The Celtic, World and New Age genres are on the up, of that there can be no doubt, and albums like **Dare to Dream** can at last be brought to the ever eager ears of our listeners, by our support of debut artists like **Unleashed Dreams** in their quest of bringing you a multi-genre release that touches just about every musical base you can think of.

*Lindsey Gaye Walker and Sean Michael Paddisio* have indeed dared to dream. This extremely talented duo have a wonderful tone and harmony about their overall performance, one that draws you in with a friendly smile and entertains you with its warm embrace.

The opening track **Deep** is one that reminds me in parts of the illustrious 2002. Walker's vocals are so deeply touching and the calming orchestral nature of this piece is sublime.

The entire album flows like a proud autumn river; it takes us on a never ending journey through a myriad of emotive, but quite beautiful compositions, like the inspirational title track **Dare to Dream Again**, the gratitude and honesty of **You Give Me Strength**, or the ever elevating and radiating **A New Day**.

Everyone will find something within this brilliant release, for me I resonated with **Resonance**, the positive and truthful energy of this piece was addictive and extremely creative; it even contained a little light rock ethic within the weave as well.

**Dare to Dream** is a debut album of an exceptional nature and class. The portal has been opened and now confidence is high that this quite breath-taking album is going to soar in the world 100 charts.

**Dare to Dream** is an album that you will really want to embrace, it is a musical panacea to cure all ills!
