I had been eagerly awaiting this much heralded single by British pianist **Annie Locke**, and to my absolute joy I was not to be disappointed, **A Handful of Memories** literally made me tingle all over with an emotion that was so powerful, yet incredibly positive.

This is her first piece of original work of music since her album **A Glimmer of Hope** back in 2017, and there is an effervesce, a sparkling energy of excitement contained within the energy of this piece that for me, brings a happy smile to this old musical heart.

Locke's performance is brimming with the confidence of a new era dawning, its full, and flourishing, but contains its ebullience within a well-structured narrative that is achieved with such style and panache, without doubt this is going to be a massive hit for the artist.
